

ABSTRACT

Methods and apparatus are described for time synchronizing a receiver to orthogonal frequency division multiplexing (OFDM) signals in a multiple-input/multiple-output (MIMO) system, the signals being transmitted from multiple transmitters and received at multiple
 5 receivers. The method includes determining the frequency offset and the sampling clock offset of the received signals.

EXPRESS MAIL CERTIFICATE

Date 2/29/00 Label No. EL4012165794S

I hereby certify that, on the date indicated above I deposited this paper or fee with the U.S. Postal Service and that it was addressed for delivery to Box 1 the Assistant Commissioner for Patents, Washington, DC 20231 by "Express Mail Post Office to Addressee" service.
